

HANDY

Strengthen the specialistic skills of the emergency services to response to the climate changes events

DESCRIPTION

The HANDY project aims to enhance prevention and preparedness for large-scale cross-border emergencies. By transferring scientific knowledge and improving specialized equipment, training courses, and joint capacity building, the project will contribute to building a more resilient Adriatic area and increasing the mutual support between civil protection bodies in addressing the climate change effects and risks at Adriatic level, such as forest fires, floods, oil spills, and earthquakes.

PROJECT DURATION
01.04.2024 - 30.09.2026

ERDF
€ 2.025.504,00

TOTAL BUDGET
€ 2.531.880,00
